

DETECTAMESH®

A high strength coloured rot resistant homopolymer polypropylene mesh incorporating traceable stainless steel wires or aluminium foil, and overprinted with a warning message in black. Used with standard pipe and cable locators for the location of non-metallic underground buried services.

- Mesh manufactured to BS EN 12613:2001
- Bagged for storage and protection
- Various colours available
- Crimps and crimping tool available
- Bespoke texts manufactured to order

MESH STRUCTURE

To ensure a continuous signal along the mesh it is important to use our wire crimps and crimping tool. This gives the join sufficient strength to cope with most back fills. If it is not installed correctly then the signal may not pass from join to join.

Crimping Tool - Y0133202

Stainless Steel Wire Crimps - Y0100001 (Packs of 100)
